Charleston, Huntington, Morgantown – WV
Casper, Cheyenne – WY

Restrictions Specific to Local High-Risk Cities

- Commanders will consider allowing telework appropriate to job series for persons living in designated cities.
- Exempt from ROM requirements: point-to-point travel for work commutes, medical appointments, official travel, and access to essential services
- Personal travel requires approval according to the 4ID COVID OPORD 20-76.
- Denver is limited by the CO-470 beltway and to the northwest CO-93/170 and US-36. All other cities are defined by their city limits.

ROM ETPs

Commanders may approve ETPs for mission critical individuals to forego the standard ROM period for non-local travel. Any ETPs for quarantine curtailment must be approved through the 4ID CG. ETPs must include the background circumstances necessitating quarantine, ETP justification, and contact information for both the requesting Commander and quarantined individual(s).

* Stopping in a high-risk area overnight requires 14-day ROM. Passing through a high-risk area without stopping does not require ROM.
