3ABCT Soldiers test next generation robotic armored vehicles

FORT CARSON, Colo. — Soldiers with the 3rd Armored Brigade Combat Team, 4th Infantry Division, are testing a next generation automated armored vehicle system at Fort Carson Thursday.

The U.S. Army Combat Capabilities Development Command Ground Vehicle Systems Center (GVSC), and the Next Generation Combat Vehicle Cross Functional Team are conducting these experiments with 3rd ABCT Soldiers to garner feedback and assess the feasibility of integrating unmanned vehicles into ground combat formations.

This is the first in a series of Soldier experiments the Army is conducting to assess if robotic combat vehicles will increase the lethality of ground combat units.

A virtual media roundtable will also be hosted Thursday at 8:30 a.m. in order to discuss this exciting new technology with subject matter experts. Media who are interested in attending should RSVP to Kim Derryberry, GVSC Public Affairs, at 586-571-5081 by 4 p.m. Tuesday.

For more information contact the Fort Carson Public Affairs Office at (719) 526-7525. After hours, please contact the 24-hour Fort Carson Operations Center at 526-5500 and ask for the On-Call Public Affairs Officer.
